

Team Energy For All: Saving Solar Power

- PV storage enables realization of > 5% total cost savings over lifetime of PV project
- 15% of the power market is a peak market that could be addressed by PV – with storage
- The current cost-barrier-to-entry limits widespread access to PV storage benefits

We believe everyone should have access to the economic and lifestyle benefits of PV storage

- We build PV storage solutions at 20% of the retail cost – which are functionally and economically superior
- We build technology that makes PV and EV batteries last 50% longer than competing technology
- We will never stop working to make PV technology more accessible – **for every American**
