

# AMERICAN-MADE PEROVSKITE CHALLENGE

## TECHNICAL ASSISTANCE REQUEST

### Earthwave Renewables

### In-Tandem Perovskite / Silicon Photovoltaic Roof

We will be leveraging the members of the American-Made Network to help us from a technology development standpoint, as well as helping us to secure viable manufacturing options. We currently have access to a pool of financial investors, but we will also utilize this network to help with potential funding needs.

Additionally, our technology team plans to work closely with National Renewable Energy Laboratory (NREL) researchers to implement conclusions from the already completed research.
