

TITLE: Cultivating Clean Energy for the Navajo Nation

TEAM NAME: Chili's Clean Crusaders

Through this partnership, we plan to achieve the sustainability goals, set by Duane "Chili" Yazzie, for the Navajo Nation community in Shiprock, NM, while still respecting and upholding the longstanding traditions that the community lives by. SunMoksha and BlueSky Power, with the guidance of Chili, plan to implement solar and solar thermal methods to improve resiliency and sustainability for the agriculture industry. In addition to preserving natural resources and reducing carbon emissions in this process, we will also delivery clean, resilient energy to the more remote commercial and residential areas of the community.
